Inventory Report—Category Specific: Jewelry

Availability: All CompuPawn systems.

Example: This example shows a report which lists all jewelry inventory ever processed by the pawnshop regardless of the “type” assigned to each inventory item.

Inputs Used: Determine reporting parameters

- *Types* = {Left blank, to select all inventory}
- *Start Category / End Category* = {14000000/14999999, for jewelry only}

Alternatively, you may run an Inventory Report that lists all “Bought” jewelry by entering **B** in the *Types* input field. Also, you may run an Inventory Report that list all “Pawned” jewelry by entering **P** in the *Types* input field.

Inventory Report—For a Specific Customer

Availability: All CompuPawn systems.

Inputs Used: Determine reporting parameters
 • *Start In Customer / End In Customer* = {specific customer number}

Example: This example shows a report which lists all inventory brought into your pawnshop by a specific customer.

Alternatively, you may print an Inventory Report that lists all inventory bought and taken out of your pawnshop by a specific customer by utilizing the *Start Out Customer* and *End Out Customer* input fields.

Also, you may print an Inventory Report that shows both inventory brought in and taken out by a specific customer by utilizing both sets of input fields.

Inventory Report—Consignment Overview

Availability: All CompuPawn systems.

Inputs Used: Determine reporting parameters

- *Types* = {S, for “Sold” Inventory items}
- *Original Types* = {C, for “Consignment” Inventory items}
- *Start In Customer / End In Customer* = {**Specific customer number**}

Example: This is an example of how to use the Inventory Report to print a list of everything that was sold from consignment for someone. This report can then be used to determine how much commission is due to the consignment customer.

Inventory Report—Location Specific

Availability: All CompuPawn systems.

Example: This is an example of an Inventory Report which lists all pawn inventory items that should be found at a specific location. Use this report as a checklist to insure that all inventory items are located where they should be.

Inputs Used: Determine reporting parameters

- *Location*= {Name of location you wish to review for a specific location OR **Left Blank**, to review all locations}
- *Types* = {**P**, for pawn inventory}
- *Sort by (1-6)* = {**1**, to sort by category}

Inventory Report—Item Description

Availability: All CompuPawn systems.

Example: This is an example of an Inventory Report which lists all inventory items that have the word “Rolex” in their item description fields.

- Inputs Used:** Determine reporting parameters
- *Item Description*= {keyword or words that will be found within the item description field of all inventory items}
 - *Types* = {**B**, for bought (retail) inventory}

This example shows your sales of Rolex watches and the profit made on each item.

Inventory Report—Lost or Stolen Inventory

Availability: All CompuPawn systems.

Inputs Used: Determine reporting parameters
 • *Status* = {Z, to select Lost or Stolen inventory }

Example: This is an example of an Inventory Report that lists all inventory items that have been lost or stolen from your pawnshop.

The status of each item may be set using the “Charge-Off” function through the “Inventory Item File Maintenance” function. The program reviews the Inventory file and lists all inventory items that have the appropriate status code for “Lost or Stolen” merchandise on the Inventory Report.

Inventory Report—As a Price List

Availability: All CompuPawn systems.

Inputs Used: Determine reporting parameters

- *Types* = {**B**, for bought (retail) inventory }
- *Page Totals* = {**Y**}
- *Print As Price List* = {**Y**}
- *Substitute Min. Price* = {**Y**}

Example: This is an example of using the Inventory Report as a simple price list. The “Minimum Price” is listed as the price on this example. Alternatively if the *Substitute Min. Price* input field is set to **N**, the “Estimated Sales Price” is used as the reference price on this list.
