# Transaction Journal Report - End of Shift

**Availability:** All CompuPawn configurations.

**Inputs Used:** • *Start Shift / End Shift* = {Use same shift number to view specific shift}

**Example:** A copy of this report is produced automatically upon entry of the ending cash drawer balance. The primary purpose of this report is to provide a listing of all transactions which are processed during the shift.

# Transaction Journal Report - Specific Transaction Types: Bank Deposit

**Availability:** All CompuPawn configurations.

**Inputs Used:** Determine reporting period (*Shift, Date, etc.*)

- *Start Shift / End Shift* = {Shift numbers accounting for month}
- *Types* = {C which is the input for Bank Deposits}

**Example:** Use specific input criteria to isolate transaction “types” of interest. This report shows an example of all *Bank Deposits* made during the month. This is useful for comparing to your bank statement in order to match deposits made and deposits recorded.

## Transaction Journal Report - Refund Transactions

**Availability:** All CompuPawn configurations.

- Inputs Used:** Determine reporting period (*Shift, Date, etc.*)
- *Start Shift / End Shift* = {Shift numbers accounting for month}
  - *Voids, Refunds Only (V/R/N)* = {**R**}

**Example:** The Transaction Journal has a specific input criteria field for viewing “Refunds” transactions only. A high volume of refunds cuts into profitability and should therefore be monitored. This example shows all refund transactions which occurred during the course of a month.
